

Copie meus **PROMPTS**

Você comentou. Aqui estão.

Os **prompts** que transformam uma simples selfie em uma imagem com **aparência de revista**.

Sem estúdio. Sem fotógrafo. Sem orçamento.

COMO FUNCIONA

Da selfie ao resultado em 3 passos

1

Tire uma selfie

Uma foto simples, com boa luz e o rosto visível. Não precisa de câmera profissional.

2

Cole o prompt

Abra o Gemini ou o ChatGPT, envie sua foto e cole um dos prompts prontos do curso.

3

Gere a imagem

Em poucos segundos você recebe uma imagem com qualidade de revista, pronta pra postar.

FOTOS LUCRATIVAS COM IA

Crie imagens **profissionais** com IA, sem precisar saber nada de design ou fotografia.

Com o curso e os prompts prontos, você cria imagens **impressionantes** com realismo, emoção e qualidade de cinema, em poucos minutos.

QUERO TRANSFORMAR MINHAS IDEIAS EM ARTE

EXEMPLO DE PROMPT DO CURSO

Veja como é simples

01 Prompt Selfie Vingadores

Sua selfie, com luz e composição de revista.

A wide-angle selfie-style group photo at the entrance of a modern movie theater at night, bright neon marquee lights and illuminated posters behind the group, glass doors reflecting the street and the lobby glow. A tight crowd of superheroes (span into the frame with a casual, fans photo energy. Thor in his armor with red cape on the left, Iron Man centered in full red-and-gold suit, Hulk towering behind everyone, Captain America in his suit on the right holding his shield partly into the lower-right of frame, Spider-Man in a classic red-and-blue suit on the far right giving a thumbs up, and Black Widow on the left in a side-tactical black suit, utility details, confident pose, leaning in close to fit the shot. The main subject is a woman/man in a blue sweatshirt in the foreground, closest to camera, arm fully outstretched toward the lens as if taking the selfie; only his hand/forearm is visible near the edge of the frame, but NO phone or device is visible at any time (hand positioned to imply holding something just out of frame). Everyone is smiling/posing for the photo, slightly compressed together, friendly and candid. Shot from slightly above eye level with strong perspective distortion from the close lens; background shows the cinema entrance stanchions and a few indistinct blurred people walking.

Lighting is natural nighttime ambient plus cinema signage illumination; no flash, soft mixed light from neon marquee and poster boxes creating gentle highlights and colored reflections on suits, realistic low-light exposure with mild motion-blur from a fast shutter, clean but slightly grainy shadows, subtle bokeh from streetlights; specular accents on Iron Man's metal and Captain America's shield without harsh hotspots. High realism, accurate proportions, detailed fabric textures, subtle wear and gloss on armor, sharp focus on the foreground subject and heroes, background softly blurred. Replace the character's face with the face of the person in the reference image. Use the reference as a strict identity guide and preserve 100% of the visible features, skin tone, skin texture, and facial hair.

Hair The hair must be exactly the same as in the reference (same length and hairstyle). Do not invent hair, do not lengthen it, do not change it, do not add white hair or spikes. If the reference includes a cap or hat, keep it.

Accessories Preserve exactly any accessory that appears on the head in the reference (glasses, earrings, piercings, caps, hats, etc), same size and position. If the reference has no accessories, do NOT add any new ones.

Format Ultra-realistic photo. Shot on a Leica M6 with 35mm Summicron. Visible 35mm film grain. Hard daylight, ISO noise in backdrop shadows, warm cast in highlighted edge, minor chromatic aberration at hairline, no styling tricks, no digital cleanup, no artificial glow. Matte skin, visible pores, light freckles. Background blurred.
